COMPANY OVERIEW

RENT AN ASTRONOMER
A Premiere Mobile Stargazing & Cosmic Observatory Experience

Company Overview
RENT AN ASTRONOMER

Alan Powell

Rent An Astronomer brings a complete observational observatory experience directly to private backyards, estate events, schools, corporate retreats, and community gatherings across Marin, San Francisco, and Sonoma counties.

Guided by Alan Powell—with 20 years experience as an astronomer—guests journey beyond the horizon to explore deep-space images through high-powered, research-grade optics. Powell translates complex astrophysics into accessible wonder, turning standard stargazing into an interactive, hands-on adventure for curious minds of all ages.

This is not just looking through a lens—it is a customized, high-profile event experience combining science, storytelling, and shared wonder under the night sky. Rent An Astronomer turns any dark yard or venue into a private observatory featuring breathtaking views of lunar craters, neighboring planets, glowing nebulae, and star clusters.

Current Stage of the Business
Rent An Astronomer has officially launched its turnkey mobile stargazing services across Northern California ahead of the peak winter night sky viewing season.

Equipped with precision optical gear and flexible programming, the service accommodates events of all sizes. Rent An Astronomer is currently expanding regional partnerships with wine country venues, resort properties, private event planners, and local educational institutions to bring accessible astronomy to audiences year-round.

WHY ASTRONOMY?

***"Somewhere, something incredible is waiting to be known."* — Carl Sagan**

Rent An Astronomer was created to bring science, wonder, and deep-space exploration out of distant observatories and directly into local communities. In an increasingly digital world, looking up through a high-precision telescope reconnects people with the fundamental mystery and awe of the universe.

Key Service Highlights & Target Events

- Private Parties & Backyard Celebrations: Transform birthdays, anniversaries, and casual dinner parties into extraordinary stargazing events where guests mingle and view deep-sky targets at their leisure.
- Corporate Galas & Executive Retreats: Add an elegant centerpiece activity to company retreats, resort guest evenings, and VIP cocktail hours with customized, host-guided stargazing stations.
- Schools & STEM Outreach: Bring physics and space science to life for students, camps, and youth groups with hands-on telescope viewing and interactive Q&A sessions.

- Community Groups & Public Parks: Engage neighborhood associations, public libraries, and local parks by hosting organized, accessible star parties for all ages.

HIGHLIGHTS

Suggested Interview & Feature Angles

1. Winter Stargazing in Northern California: Why November through January offers the clearest night sky viewing across Marin, Sonoma, and San Francisco.
2. Bringing Science to the Backyard: How mobile observatories are redefining private event entertainment with immersive STEM experiences.
3. Navigating the Night Sky at Home: Expert stargazing tips from Alan Powell for beginners and families looking to explore the cosmos.

Client Praise

"Alan's knowledge and his precision instruments, along with his passion for astronomy, made for a great evening! Highly recommend!"

— Sandra Evans, CEO of Wire Notebook
